LaCie photon20visionII

Brilliant color for the graphics professional

ERGONOMIC COMFORT
These progressive LCDs can be used with an ergonomic desk clamp and an extendable arm, allowing the display to be moved in every direction without occupying valuable desk space. Offering tilt and swivel adjustment for optimum viewing control, an additional, detachable foot can be used for placement on the desktop.

PIVOT TECHNOLOGY
The photon20visionII can be used in either landscape or portrait mode, enabling graphic designers to see an A4 or US letter-size document at 1:1 scale in either page layout.

WIDE-VIEWING ANGLE TECHNOLOGY
Providing impressive native resolution, state-of-the-art color accuracy, and increased brightness and contrast, LaCie photon20visionII monitors feature Wide Viewing Angle technology that allows the user to see accurate color without image distortions from a variety of angles.

BROAD COMPATIBILITY
Offering astounding picture quality required for demanding design applications, LaCie photon20visionII monitors come with one VGA connector, one DVI connector and one ADC to DVI adapter for connection to almost any Mac or PC.

OPTIONAL COLOR CALIBRATOR
Ideal for use in multi-workstation environments, LaCie photon20visionII monitors can be used with the LaCie blue eye vision. This compact device performs software calibration on LaCie LCD displays and hardware calibration on LaCie CRT displays running Mac OS 9, Mac OS X and Windows operating systems.
